## Garden Suburb Junior School

Our Mathematics curriculum aims to ensure all pupils:

- Our Maths curriculum aims to ensure that all pupils:
- Become fluent in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils develop conceptual understanding and the ability to recall and apply knowledge rapidly and accurately.
- Reason mathematically by following a line of enquiry, conjecturing relationships and generalisations, and developing an argument, justification or proof using mathematical language
- Can solve problems by applying their mathematics to a variety of routine and non-routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions.

|  | Autumn 1 |  | Autumn 2 |
| :---: | :---: | :---: | :---: |
| Weeks 1-2 <br> Place Value | To read and write seven-digit numbers <br> To identify the value of each digit in a seven-digit number <br> To use the value of the digits to compare and order numbers <br> To round any whole number to the required degree of accuracy <br> To perform mental calculations, including with mixed operations and large numbers <br> To use negative numbers in context, and calculate intervals across zero To use and apply place value knowledge to solve problems-assessment task To understand and use Roman numerals | Week 1 Simplify, compare and order equivalent fractions <br> Week 2 <br> Addition and subtraction of fractions | To use common factors to simplify fractions <br> To use common multiples to express fractions in the same denomination <br> To generate and describe linear number sequences (with fractions) <br> To compare and order fractions using the denominator <br> To compare and order fractions using the numerator <br> To add fractions with different denominations and mixed numbers, using the concept of equivalent fractions <br> To add fractions using part- whole models and bar models To subtract fractions using the concept of equivalent fractions To use addition and subtraction of fractions to solve problems |
| Weeks 3-4 Addition and Subtraction | To add a multiple of 10,100 or $1000,10000,100000$ from a six- or seven-digit number <br> To add six- seven-digit numbers using the formal written method of columnar addition <br> To add numbers with up to two decimal places using the formal written method of columnar addition <br> To practise addition for larger numbers, including both mental and written methods <br> To subtract a multiple of 10,100 or $1000,10000,100000$ from an even six- or seven-digit number <br> To subtract six- seven-digit numbers using the formal written method of columnar subtraction <br> To subtract numbers with up to two decimal places using the formal written method of columnar subtraction <br> To practise subtraction for larger numbers, including both mental and written methods | Weeks 3 Multiplication and division of fractions <br> Week 4 Fractions of amounts | To multiply fractions by whole numbers, writing the answer in its simplest form <br> To multiply fractions by fractions, writing answers in the simplest form <br> To divide proper fractions by whole numbers <br> To use four operations with fractions <br> To work out fractions of an amount <br> To find the whole amount from a fraction <br> To solve problems that involve adding, subtracting, multiplying and dividing fractions |
| Weeks 5-6 Multiplication and division | To identify common factors and common multiples <br> To recognise prime and square numbers <br> To make a reasonable estimate of the answer to a calculation and use this to check the answer <br> To use a written method to calculate multiplication of TO $\times$ TO <br> To use a written method to calculate multiplication of HTO $\times$ TO | Week 5 Prime, square and cube numbers BODMAS | To identify prime numbers <br> To explore the relationship between square and cube numbers To use their knowledge of the order of operations to carry out calculations involving the four operations <br> To use BODMAS to solve problems and end of unit test |

|  | To use a written method to calculate multiplication of ThHTO $\times$ O <br> To use the formal written method of short division to calculate ThHTO $\div 0$, <br> ThHTO $\div 11$ and ThHTO $\div 12$ <br> To use factors to solve division calculations <br> To use the formal written method of short division <br> To use and apply knowledge of four operations to solve problems | Week 6 <br> Measurement- <br> converting units | To read, write and recognise metric measures of length, mass and <br> capacity <br> To convert between units of length, mass and capacity <br> To calculate with metric measures using conversion skills <br> To calculate and convert between units of time <br> To solve problems with time including calculating average speed <br> To convert between miles and kilometres <br> To understand imperial measure and convert between metric and <br> imperial |
| :--- | :--- | :--- | :--- |
|  |  | Week 7 <br> End of <br> unit/term <br> assessments | To consolidate understanding of topics this term <br> To complete assessments <br> To investigate Christmas tangrams |
| Tangram <br> investigation |  |  |  |

|  | Spring 1 |  | Spring 2 |
| :---: | :---: | :---: | :---: |
| Weeks 1-2 Algebra (Week 1 of this at end of Autumn 2) | To find a rule using simple formulae- one step function | Week 1 | To use correct ratio language |
|  | To find a rule using simple formulae - two step/ linear equations | Ratio and | To use the ratio symbol |
|  | To form expressions | proportion | To recognise ratio as fractions |
|  | To substitute and express missing number problems algebraically |  | To calculate ratio |
|  | To create formulae |  | To use scale factors to draw shapes |
|  | To form equations |  | To calculate scale factors of shapes |
|  | To solve one step equations |  | To solve ratio and proportion problems |
|  | To solve two step equations |  |  |
|  | To find pairs of values -1 | Weeks 2-3 | To find and draw shapes that have the same area |
|  | To find pairs of values - 2 | Measurement Area and | To be able to calculate the area and perimeter of shapes including compound shapes To address misconceptions of reasoning papers |
|  |  | perimeter | To find the area of a triangle by counting squares |
| Weeks 3-4 <br> Decimals | To identify the value of each digit in numbers given to 3 decimal |  | To use formula to calculate the area of a right angled triangle |
|  | places |  | To be able to calculate the area of different triangles |
|  | To multiply numbers by 10, 100 and 1,000 giving answers up to 3 |  | To calculate the area of parallelograms |
|  | decimal places. |  | To count cubes to calculate volume |
|  | To divide numbers by 10,100 and 1,000 giving answers up to 3 decimal places. |  | To use formula to calculate the volume of a cuboid |
|  | To multiply 1 digit numbers with up to 2 decimal places by integers. To divide numbers with up to 2 decimal places by integers. | Weeks 4-6 | To recognise and label the properties of 2d and 3d shape |
|  | To solve problems which require answers to be rounded to | Properties of | To use knowledge of shapes and measure to draw shapes accurately |
|  | specified degrees of accuracy. | shape 2d and | To recognise 3d shapes from nets |
|  | To recall and use equivalences between simple fractions and decimals in different contexts. | 3d and surface area | To draw nets of 3D shapes |
|  | To be able to use division to convert fractions to decimals | les |  |
|  | To |  | To recognise and label a range of angles |
| Weeks 5-6 | To be able to convert fractions to percentages |  | To calculate angles around a point and on a straight line |
| Percentages | To be able to convert between fractions, decimals and percentages |  | To calculate angles vertically opposite angles |
|  | To be able to order fractions, decimals and percentages |  | To calculate angles in a triangle |
|  | To solve problems involving the calculation of percentages |  | To explore the interior angles of quadrilaterals |
|  | To use fractions to find percentages of amounts -1\% 10\% 25\% 50\% |  | To explore the interior angles of regular polygons |
|  | To use fractions to find percentages of amounts- compound percentages e.g. 15\%, 20\% and 35\% | Geometry- | To describe positions on the full coordinate grid (all four quadrants) |
|  | To use percentages to find missing values <br> To understand percentage increase and decrease | position and direction | To draw and translate simple shapes on the coordinate plane To reflect shapes across the axes |

Garden Suburb Junior School
Mathematics Curriculum Overview 2023-2024
Year Group: 6

|  | Summer 1 |  | Summer 2 |
| :---: | :---: | :---: | :---: |
| Weeks 1-2 <br> Statistics | To be able to Illustrate and name parts of circles- radius, diameter and circumference and know that the diameter is twice the radius. <br> To be able to read and interpret pie charts <br> To use percentages to understand pie charts <br> To construct pie charts and use them to solve problems <br> To be able to calculate the mean as an average. <br> To be able to read and interpret line graphs <br> To be able to draw line graphs <br> To be able to interpret and construct line graphs and use them to solve problems. | Week 1-2 <br> Money | To know that money, and ways to pay, have developed in many different forms throughout history e.g. barter, coins, notes etc To understand the history of currency and coinage <br> To know how to managing a budget |
| Weeks 3-5 <br> Mock SATs weeks <br> And SATs week |  | Week 3-4 <br> Investigations <br> Amusement Park <br> Project | To reason and problem solve using all 4 operations To be able to use the correct mathematical vocabulary for running a business To use and apply money skills to context of amusement park |
